ABOUT ME

I'm a Back-End Web Developer responsible for managing the interchange of data between the server and the users. My primary focus will be on development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end.

Searching for real and tough challenges that can squeeze out the best of me, Pushing my limits over and over again, And last, but not least, to enjoy my life.
